Summary

Passionate about the world of technology, I really like to learn about new tools and keep up to date. I mainly develop as a back-end, but I'm also interested in participating in other roles. I have experience working with PHP and frameworks like Laravel

Professional experience

Back-end Developer [Polytechnic University of Durango] [September 2022] - [December 2022]

- Connection to the database.
- Development of constraints for user records.
- Development of an email service for the verification of records.

Back-end Developer [Cattle Corner] [January 2023] - [April 2023]

- Connection to the database.
- Development of constraints for user records.
- Development of an email service for the verification of records.
- Migrate the system from PHP to Laravel.
- Change the CRUD made with PHP to Laravel with blade.

Achievements

1. I developed an artificial intelligence that helped us predict which political party was most likely to win each country's elections

Education

Software Engineering [Polytechnic University of Durango] [Coming to graduate in 2024]

Title: Software Engineer
